

Privacy Browser - Feature #111

Automatically select all the text in `urlTextBar` when the user taps on it.

Description			
The most common reason a user would tap on `urlTextBar` would be to type another domain. As such, the default behavior should be to autoselect all the text.			
Enhancement suggested by Jose A. León Becerra.			

History

#1 - 03/24/2017 11:42 AM - Soren Stoutner

- Status changed from New to Closed

Fixed in commit <https://git.stoutner.com/?p=PrivacyBrowser.git;a=commitdiff;h=ae8ec5933c1a27578610e0f0513d9a778dba51c3>.

The user can tap once after focusing `urlTextBox` to get a single cursor for editing the URL. A double-tap displays the options for cut, copy, paste, etc.
