History

#1 - 06/08/2017 04:36 PM - Soren Stoutner

- Status changed from New to In Progress

Commit <https://git.stoutner.com/?p=PrivacyBrowser.git;a=commitdiff;h=6b80f3b394479dc49a3a4dfce730fada4bba8a70> hides the keyboard, but the options menu doesn't resize to fill the empty space.

#2 - 06/13/2017 12:07 PM - Soren Stoutner

- Priority changed from 3 to 3.x

I reverted the change because the buggy behavior was too annoying.

I am going to push this off to the 3.x series and revisit it then to see if there is a better solution (perhaps Google will fix the underlying Adroid bug).
