

Privacy Browser - Feature #245

Add the ability to keep cookies linked to domain setting when exiting

01/31/2018 12:56 PM - JB Hétier

Description			
I have a few websites with domain settings configured to allow cookies. I sometimes use cookies on other websites. When selecting "Clear and Exit" I would like the ability to delete all cookies except those affiliated with domain settings.

- Priority changed from 2 to 4.x

That is a good idea.

WebView's cookie manager does not have the ability to delete some cookies and not others.

<https://developer.android.com/reference/android/webkit/CookieManager.html>

However, with the release of Privacy WebView in the 4.x series, it will be possible to add this functionality.

The plan is to have an option in domain settings that will allow the user to select if cookies from that domain should be saved.
