

Privacy Browser - Bug #370

Fix a SSL certificate pinning bug introduced in 2.15.

01/28/2019 04:21 PM - Soren Stoutner

Status:	Closed	Start date:	01/28/2019
Priority:	Critical Bug	Due date:	
Assignee:	Soren Stoutner	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
This was a bug introduced by a typo (`navigatingHistory` instead of `!navigatingHistory`) in commit https://git.stoutner.com/?p=PrivacyBrowser.git;a=commitdiff;h=eb5895f27130aee9da36f06da293ae4a788c75c0 .			
It was first present in the 2.15 release.			
It caused all SSL certificate mismatches to be ignored unless navigating history.			

History

#1 - 01/28/2019 07:29 PM - Soren Stoutner

- Priority changed from Next Release to Critical Bug

#2 - 01/29/2019 03:21 PM - Soren Stoutner

- Status changed from New to Closed

Fixed in commit <https://git.stoutner.com/?p=PrivacyBrowser.git;a=commitdiff;h=6b4312dc0c2d6cb059a0fbe6d4e7cd9317db34b6>.

Due to the other changes that have been made, there is no longer any need to differentiate pinned behavior when navigating history.

#3 - 01/29/2019 03:48 PM - Soren Stoutner

- Tracker changed from Feature to Bug

- Subject changed from Fix a SSL certificate pinning introduced in 2.15. to Fix a SSL certificate pinning bug introduced in 2.15.
