<b>Description</b>			
Currently, when moving a bookmark the ListView is moved to `setSelection(selectedBookmarkNewPositon - 5)`. It would be nice to implement a more sophisticated scrolling, but it doesn't work well because `getFirstVisiblePosition()` and `getLastVisiblePosition()` are not always accurate with partially displayed bookmarks, especially with an overlaid AppBar, making the number of calculated visible bookmarks vary.			

#### History

##### #1 - 08/17/2016 10:30 AM - Soren Stoutner

This could probably be accomplished by storing the scroll position and restoring it after a change rather than calculating it off of the ListView item position.

##### #2 - 05/23/2017 04:16 PM - Soren Stoutner

- Priority changed from 3.x to 3

##### #3 - 09/22/2017 03:26 PM - Soren Stoutner

- Priority changed from 3 to 3.x

I am going to put this off for a while, and perhaps not make any changes at all. `setSelection(selectedBookmarkNewPositon - 5)` works well. Making changes could get complicated if the bookmark scrolls off the screen.

##### #4 - 09/25/2017 05:04 PM - Soren Stoutner

- Priority changed from 3.x to 3

##### #5 - 09/29/2017 02:22 PM - Soren Stoutner

- Status changed from New to Closed

Implemented in commit <https://git.stoutner.com/?p=PrivacyBrowser.git;a=commitdiff;h=4ecb96eb93da652b3264b1931e344222c2d5d833>.

##### #6 - 02/23/2018 12:37 PM - Soren Stoutner

- Priority changed from 3 to Next Release
