

## Privacy Browser - Bug #422

### User agent settings are not applied on redirects via URL shorteners.

04/29/2019 05:22 PM - Soren Stoutner

<b>Status:</b>	New	<b>Start date:</b>	04/29/2019
<b>Priority:</b>	4.x	<b>Due date:</b>

<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
<ol style="list-style-type: none"><li>1. Set Privacy Browser to use WebView Default as the user agent.</li><li>2. Create a domain setting for github.com that uses `PrivacyBrowser/1.0` as the user agent.</li></ol> <p>When loading GitHub via normal means the desktop version is presented based on detection of the user agent. However, when loading GitHub via a URL shortener, like tinyurl.com/y99jqpf0, the domain settings are applied, but it appears they take effect after the user agent has already been sent to the server. So the mobile version is loaded.</p>			

### History

**#1 - 05/27/2019 06:57 AM - Soren Stoutner**

- Priority changed from 3.x to Next Release

**#2 - 07/17/2019 03:53 PM - Soren Stoutner**

- Priority changed from Next Release to 4.x

This will have to wait for the release of Privacy WebView because Android's WebView does not expose when a URL is being redirected.
