Description			
<p>Hi, Thanks for your good browser. I tried many browsers on android, Only this one is the most handy one I like most. But to my daily usage, It lacks some Font Size options like other browsers, Which are: 33% / 67% / 80% / 90% / 110% Can you please add these 5 Font Size options? BTW, If you think there are too many, Please do add 80% / 90% / 110% These 3 options is really necessary on 10.1 inch tablet devices. When Font Size is set to 'M' in android display settings, the 80% / 90% makes the text smaller and easier to read. (Won't be too large) And When I choose Font Size to 'S' in android display settings, the 125% makes font too large. So, I really wish to have Font Size 110% options in this case.</p> <p>Thanks for your great work.</p>

I think it is a good idea to have more font options. Instead of trying to guess all the various sizes that people want, I think I will just make the option a free form text box where users can choose any font size they like. That's a little bit complicated to program, but I think the end result will be better.
