

## Privacy Browser Android - Feature #570

### address bar pulldown option

05/18/2020 11:47 PM - Richard Lucassen

<b>Status:</b>	New	<b>Start date:</b>	05/18/2020

<b>Target version:</b>		<b>Spent time:</b>	0.00 hour
<b>Description</b>			
In "Naked Browser Pro" the address bar only shows up when the (long) page is at the top or when the "swipe down" starts at the top of the page, otherwise the address bar stays hidden. It would be nice if PB had such a comfortable option as well.

I will take a look at how easy it would be to implement that. Note that Privacy Browser is designed in such a way that the app bar cannot be spoofed by websites, as has been possible in the past with other browsers.

This is an important security design, but it also makes it more difficult to implement custom features like this. Therefore, the amount of effort this feature would require will likely determine if it is implemented.
