

Privacy Browser Android - Feature #62

Add an option to disable WebRTC

09/14/2016 09:55 PM - Soren Stoutner

Status:	New	Start date:	09/14/2016
Priority:	4.x	Due date:

Target version:		Spent time:	0.00 hour
Description			
WebRTC can leak local IP information even when using Orbot. Either we need to find a way to proxy it as well (perhaps with SOCKS) or disable it.			
https://ipleak.net/			
WebRTC only works when JavaScript is enabled.

Apparently, currently it is not possible to directly disable WebRTC: <http://stackoverflow.com/questions/36174648/disable-android-webview-webrtc>

#3 - 05/23/2017 04:20 PM - Soren Stoutner

- Priority changed from 2 to 3.x

- Parent task set to #86

Unless Google adds WebRTC controls to the standard WebView, implementing this feature will require WebView to be forked to create Privacy WebView as part of the 4.x series. Until that time, WebRTC only works when JavaScript is enabled, so browsing with JavaScript disabled (the default) also disables WebRTC.
