| <p>This will be a rolling fork composed of a series of minimally invasive patches that will be rebased on each upstream release of Android's WebView. API compatibility will be maintained with WebView, in the sense that no methods will be removed (although some might become a NOOP or otherwise be modified). New methods will also be added providing increased privacy controls. This design will allow Privacy WebView to replace Android's WebView on custom ROMs without breaking other programs that use WebView.</p> |                |                        |            |

#### History

**#1 - 11/06/2017 07:45 PM - Soren Stoutner**

- Priority changed from 3.x to 4.x

**#2 - 02/08/2018 10:53 AM - Soren Stoutner**

- Description updated

**#3 - 12/27/2018 03:48 PM - Soren Stoutner**

- Subject changed from Create a fork of WebView called Privacy WebView to Create a rolling fork of WebView called Privacy WebView
